

ABELDent: A Superior Solution for Good Reason

Our commitment to being **Your Strategic Partner for Practice Success™** is more than a slogan: It is a promise that we take seriously.

From the initial investment through conversion and implementation and for the life of your practice, our goal is to add value at every turn. Put our unparalleled clinical and practice management solutions to work for you.

Here are the **Top Ten Reasons to Choose ABELDent Software** for your practice:

1. Reach full business potential: ABELDent's *Practice Management By Objectives™* methodology that focuses on **6 key objectives** that consistently drive measurable improvement.
2. Enjoy peace of mind: a **financially stable and committed Canadian company** with a 39-year history of specializing in healthcare software development.
3. Experience exceptional service: personalized post-sales assistance, flexible Software Maintenance options and **prompt and professional technical support 24/7/365**.
4. Get a quick start: assurance of data conversion continuity, integration with most third-party imaging software at no additional charge and customized training for a **smooth and efficient transition** to your new software.
5. Realize **immediate workflow benefits** and administrative improvements: intuitive, easy-to-learn and easy-to-use features and the capability to adapt to your routine.
6. Optimize productivity: advanced features for **automated tracking and management of unscheduled and recommended treatment** support your ongoing revenue stream.
7. Maximize **effectiveness through ongoing learning**: customized training, webinars, educational videos, and many other MyABEL tools for your entire team.
8. Achieve **peak patient communication**: fully integrated Portal for practice/patient interaction that goes far beyond email and text reminders.
9. Go fully **paperless at any time without the need to purchase additional software modules**: attain savings and ensure data synergy with integrated patient records.
10. **Maximize system security and reliability**: user defined software access permissions and modified transactions tracking, regulatory body record-keeping compliance, database stability with Microsoft SQL Server and secure data backup services.
