

ABELDent

Grow. Protect. Prosper.
At Every Stage of Your Practice

ABELDent CS
Cloud Server Solution

ABELDent LS & LS+
Local Server Solutions

Gain a competitive edge for your practice with ABELSoft – Canada's leading provider of outstanding clinical and practice management software.

You'll have the largest support resources in the industry at your fingertips. 24/7/365 telephone support and regular updates provide peace of mind and maximum ROI for your practice.

To ensure your ongoing success we offer cost-effective services, customized online/on-site training programs and a customer portal that gives you anytime access to valuable tools and information.

The quality of our dental software and services is demonstrated by our customer retention rate which is better than 99%!

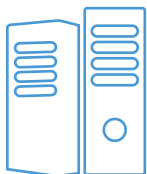

ABELDent Solutions

Manage your practice better than ever before by leveraging ABELDent Cloud Server or Local Server solutions (including ABELDent 14 or earlier local server versions). Either way, you will enjoy improved practice profitability and increased patient satisfaction!

What is the ABELDent CS solution?

An innovative cloud server solution inspired by our relationships and experiences working with thousands of dental offices for over three decades. ABELDent CS is designed to allow smooth transition from whatever you may be using to run your practice. You will be better equipped to grow and protect your practice in today's digital world.

What are the ABELDent local solutions?

Full-featured solutions where the program and data reside on a local server. ABELDent LS provides all the functionality required now and, in the future, to help improve practice efficiency and maximize your bottom line. The soon to be released ABELDent LS+ has the same user interface as our CS solution, but the LS+ data resides on a local server.

Grow. Protect. Prosper.

Whichever solution you choose, we will help you grow and protect your practice from day one. *

Grow

- **Reputation Management Service (RMS):** Facilitate positive, online patient reviews to attract new patients that will help your practice grow.
- **New Patient Onboarding:** Accept new patients through your website with minimal effort on your part!
- **Patient Self-Booking:** Keep your schedule full with minimal effort by allowing online appointment requests and booking.
- **Advanced Reporting and Practice Analytics (ARPA):** Transform your practice data into stunning visual reports that make it easy to make actionable, data-driven decisions that improve patient care and increase your practice's bottom line.
- **Patient Communications:** Save time/avoid no-shows with automated text/email appointment confirmations and combined family reminders. Make contact instantly with two-way texting. Reactivate overdue/inactive patients faster. Automate birthday wishes to delight patients. Attract new patients with promotional messaging.
- **Multi-Location Support:** Manage multiple practices at any location using a single system.
- **Enterprise Reporting:** Produce customized, consolidated reports for multiple locations.
- **Referral Management:** Track which referral sources generate the best return.

Protect

- **Authorization Manager:** Using assigned role-based privileges, restrict access to sensitive data and functions to protect your patient privacy and your practice.
- **Data Backups:** Benefit from regular, automated backups for cloud data and our Remote Backup Service for data stored locally.
- **CASL Support:** Protect your practice against lawsuits with full CASL compliance when using integrated patient messaging.
- **ITRANS 2.0 Support:** Stay current with the latest insurance transmission security and privacy standards. <https://www.ABELSoft.com/ITRANS>
- **Record Keeping:** Sophisticated audit trails help protect your valuable data and identify potential problems.
- **Sterilization Equipment Integration:** Gain peace of mind by uploading sterilization records into individual patient files to document safety compliance.

Prosper

- **Payment Card Processing:** Eliminate manual payment card entries and simplify bank reconciliation with ABEL Pay.
- **Patient Kiosk:** Speed up check-in and reduce front desk traffic.
- **Voice Activated Periodontal Charting:** Save time and staff resources using voice commands to chart periodontal conditions.
- **Advanced Productivity Tools:** Boost practice efficiency and security with cloud access to Office 365 applications.
- **Payroll and HR Management:** Streamline staff administration with HR management and payroll integration.
- **Accounting Integration:** Transfer of ABELDent revenue information to Microsoft Dynamics 365 Business Central and other popular accounting packages provides full financial reports including the ultimate financial metric – profit margin.
- **Document Manager:** Store patient related correspondence from any source electronically in the patient file.
- **Health History:** Improve efficiency by having patients complete/update Health History on a tablet. Information entered on the Health History is available in the patient chart for the dentist to review.

*Some ABELDent features/functions are not currently available in all versions.
