Grow and Protect Your Practice

Dental Practice Management
Software Made Easy

Empowering Dentists to Profitably Deliver Quality Patient Care

Dental Practice Challenges

- Better Staff and Patient Experience
- Patient Growth and Retention
- Maximized Practice Performance
- Data Security and Costs

To meet the challenges in an increasingly competitive market, dental practices must:

- Focus on staff and patient satisfaction
- Have access to useful performance metrics
- Protect practice data cost effectively

The Ideal Solution

- Logical and time-saving administrative and clinical workflows
- Objective and easy to produce practice reports for monitoring performance
- Cloud solution for maximum and cost effective practice data security

- Patients are looking for a great experience
- Practices are looking for increased operational efficiencies and margins
- Practices and patients are looking for assurance that their information is safe from data breaches

Desired Outcomes

When deploying this solution customers are looking for time-savings, cost savings and ease of use compared to what they are currently experiencing. The incremental benefits must exceed any pain associated with the change.

- Stress free dental team
- Satisfied patients
- Efficient and profitable practice
- Peace of mind

ABELDent Inc.
Grow and Protect Your Practice

Grow and Protect Your Practice with Proven Solutions

Better Experience

Patient Manager:

- Efficiently tracks the patient visit in real time to optimize productivity, better inform staff and reduce team stress
- Allows for addressing patient issues as they arise and patients know their time is respected

Patient Growth

Patient Portal:

- Provides convenient and time-saving automated patient communication that attracts and retains new patients
- Gives patients timely and secure access to their information for confirmation and requests

Optimized Performance

Advanced Reporting:

- Integration with Dynamics 365 gives an accurate financial picture for better cost control and real-time profit metrics
- Practice analytics monitor daily operations and produce KPIs for informed management decisions

Data Security

Cloud-based Platform:

- Local application workstations access practice data securely stored and backed up in the cloud – no server required
- Third party integrations are preserved and automated updates replace manual ones

ABELDent Cloud Server (CS) solution empowers dental professionals to deliver quality patient care – profitably, efficiently and securely.

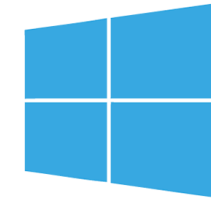

ABELDent CS

Microsoft Dynamics 365
Business Central

Office 365

Microsoft
Azure

With Azure, ABELDent Cloud Server (CS) solution is much more scalable and practice data is highly secure. Integration with Microsoft Dynamics 365 and Office 365 provides advanced reporting and productivity tools

Cloud Protection

Robust, redundant and highly secure Microsoft servers in the cloud store and backup ABELDent data, eliminating the need to purchase and maintain an expensive on-site server. Data is protected, downtime is no longer an issue and application upgrades are quick and painless.

Full Financials

ABELDent CS solution revenue information with Dynamics 365 to provide complete financial statements and advanced reports. The net result is a more accurate financial picture for better cost control and practice performance assessment.

Productivity Tools

ABELDent CS solution works with Office 365 productivity tools in the cloud so all valuable practice files are protected. Outlook Email is encrypted for maximum security and practice data can be exported to Word templates and Excel spreadsheets to maximize productivity.

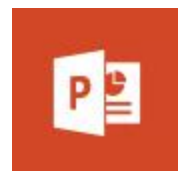

Outlook

Word

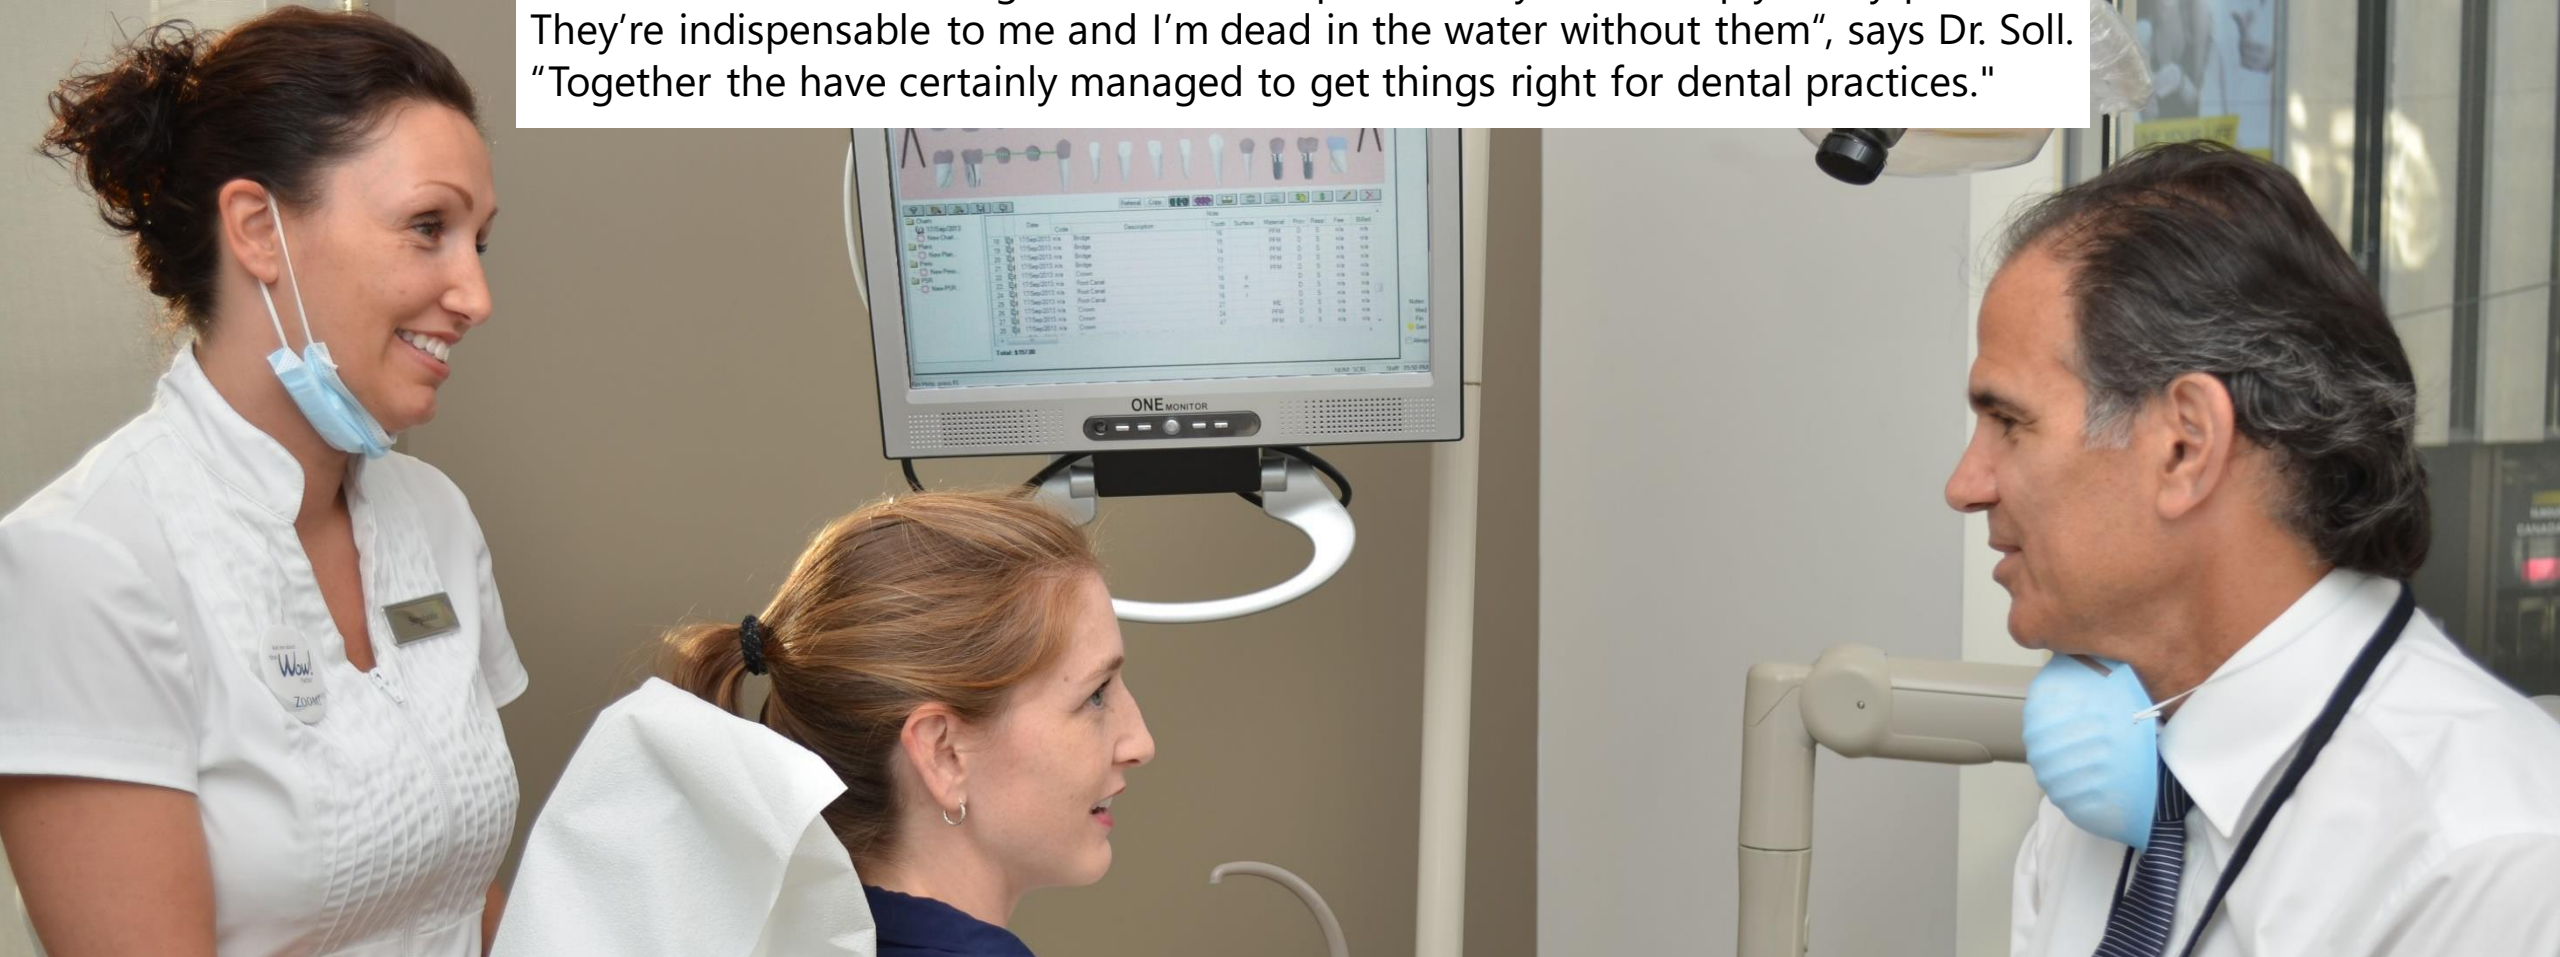

Excel

PowerPoint

Dr. Jordan Soll, Central Dental Group

"ABELDent software along with Microsoft productivity tools simply IS my practice. They're indispensable to me and I'm dead in the water without them", says Dr. Soll. "Together they have certainly managed to get things right for dental practices."

Practice Productivity

"ABELDent's integration with Office 365 enables our office to be so much more efficient and productive, and I really like Outlook for secure access to my email and updating my calendar."

Practice Security

"I use ABELDent's remote backup service which leverages Microsoft Azure in the cloud for effortless and secure backup of my valuable data."

What's Coming

"The new ABELDent Cloud Server (CS) solution will provide additional security measures and integration with Dynamics 365 for a complete financial picture of my practice."
