# ABELDent Cloud Server (CS) solution: Microsoft Windows-Based Dental Practice Management Software to Grow and Protect Your Practice

ABELDent Inc.
Grow and Protect Your Practice

WINDOWS SOLUTION BUILDER PROFILE: ABELDENT INC.

ABELDent Inc. is a Microsoft Gold Certified Partner and leading provider of outstanding dental practice management/clinical software, exceptional customer service and 24/7 support. Our ABELDent Cloud Server (CS) solution leverages the Microsoft Azure cloud platform and Microsoft business applications to deliver solutions that give dental professionals a competitive edge.

SOLVE THESE FOUR CHALLENGES FOR BUILDING A SUCCESSFUL DENTAL PRACTICE

Satisfying User and Patient Experience	High Patient Growth and Retention	Maximized Practice Metrics and Performance	Enhanced Security and Reduced Costs

PATIENT MANAGER
Efficiently track the entire patient visit in real time to optimize productivity and reduce stress. Issues can easily be addressed as they arise and patients will know their time is respected. Important alerts and an easy-to-use Patient Dashboard give you instant access to key information saving the time/effort of navigating to other screens.

PATIENT PORTAL
Attract and retain new patients with automated communication that provides a higher level of service. Two-way texting and email saves you time with appointment confirmation/notices that conveniently sync with patients' e-calendars. The ABELDent portal also gives patients timely and secure access to account status and health history.

ADVANCED REPORTING
View a complete and accurate financial picture for better expense control and real-time profit calculations with Dynamics 365 integration. Standard Reports monitor your daily operations and with the Analytics Reports Module you can produce Key Performance Indicators (KPIs) to help you make better informed practice management decisions.

CLOUD PLATFORM
Save time, expense and worry. No server is required since local workstations access data securely stored and backed up on Microsoft cloud servers. Third party integrations are preserved and manual upgrades are replaced with regular automated updates. Feature and data access is restricted based on user roles.

WHAT OUR CUSTOMERS ARE SAYING

"ABELDent simply IS my practice – it's indispensable to me and I'm dead in the water without it. They've certainly managed to get things right" – Dr, Jordan Soll, Aesthetics in Dentistry
